**myGrid™ Overview**

- **A. Device charging surface**
- **B. DC power plug**
- **C. Indicator light**

**Operation**

1. Place the myGrid™ charging pad in your favorite flat location.
2. Plug the AC adapter into the wall outlet.
3. Insert the DC power plug firmly into the myGrid™ charging pad.

**Operation - continued**

Charging your myGrid™-enabled devices

- Once the myGrid™ charging pad is powered on, the indicator light will turn on while the system status is checked. If the system is functioning properly and there is no fault detected (i.e., keys, metal object, or a hand placed on the charge pad), then the indicator light will turn off in 3-5 seconds.
- You are now ready to charge your myGrid™-enabled devices. Simply place them on the myGrid™ charging pad with the contacts facing down. The indicator light will light up to show you what your device is receiving power; a flash is detected, the indicator light will (1) not appear upon initial power up or (2) turn off during operation.
- When not in use, the myGrid™ charging pad will be in Sleep Mode. In this mode, the charging surface and the indicator light both turn off.
- You can simultaneously charge up to four myGrid™-enabled devices (BlackBerry’s, Motorola Phones, Apple iPhone, etc.) on the myGrid™ charging pad. Make sure that the devices are sitting flat on and making firm contact with the charge pad.
- Make sure to place only myGrid™-enabled devices on the pad. Devices that are not compliant will not receive power.
- Non-compliant devices will not be damaged but will also not receive power from the charging pad.

**Problem Cause Solution**

- Indicator light does not turn on.
  - Ensure proper contact between the device and the charging pad.
  - Remove any metal object or a hand placed on the charge pad.
- Indicator light blinks on and off (devices not charging).
  - Ensure the devices are sitting flatly on the myGrid™ charging pad.
- Indicator light continuously blinks until proper contact is made.
  - Make sure that the devices are sitting flatly on the myGrid™ charging pad.
- Indicator light does not turn on.
  - Ensure proper contact between the device and the charging pad.
  - Remove any metal object or a hand placed on the charge pad.
- Indicator light does not turn off after proper contact is made.
  - Ensure proper contact between the device and the charging pad.

**Cleaning the myGrid™ Charging Pad**

- Disconnect power from the myGrid™ charging pad.
- Unplug power plug from charging pad.
- Remove any excess moisture with a clean, dry cloth.
- Disconnect power from the myGrid™ charging pad.
- Ensure that device is resting flatly on the myGrid™ charging surface.
- Ensure that dirt or other contaminants are not on the myGrid™ charging pad.
- The AC wall outlet shall be located near the myGrid™ charging pad.

| Indicator light does not turn on or is flashing | Device is not myGrid™-enabled | Reconnect power to the myGrid™ charging pad. Remove devices, one at a time, until proper contact is made. When proper contact is achieved, the indicator light will turn off.
| Indicator light does not turn off after proper contact is made | Device is not making proper contact with the myGrid™ charging pad | Remove devices, one at a time, until proper contact is made.
| Indicator light continuously blinks until proper contact is made | Device is not resting properly on the myGrid™ charging pad | Ensure that device is resting flatly on the myGrid™ charging pad.
| Indicator light does not turn on | Device is not making proper contact with the myGrid™ charging pad | Reconnect power to the myGrid™ charging pad. Remove excess moisture with a clean, dry cloth.

**Technical Specifications**

- Max Number of Devices: 5 (15W max)
- Dimensions: 6.75 in. W x 8.5 in. L x 0.75 in. H
- Power output: 15VDC; 1A
- Power input: 100 – 240 VAC, 0.4 Amps, 50 – 60 Hz
- Weight: 4 oz.
- Certifications: FCC, ETL

**For additional charging options, look for:**

- Duracell Power Clip™
- Duracell Power Sleeve™
- BlackBerry Curve
- BlackBerry Pearl
- iPod touch
- iPhone

**Quality Guarantee**

DURACELL offers a limited 1-year guarantee against offers due to faulty materials or workmanship and guarantees the performance of each DURACELL myGrid™ device for 1 year from date of purchase if found to be defective. If a DURACELL myGrid™ device is returned without charge, DURACELL will replace it, free of charge, for up to four devices.
Operation

1. Place the myGrid™ charging pad in your favorite flat location.
2. Plug the AC adapter into the wall outlet.
3. Insert the DC power plug firmly into the myGrid™ charging pad.

4. Maintenance and Usage
   - The AC wall outlet shall be located near the myGrid™ charging pad and shall be easily accessible.
   - The myGrid™ charging pad can charge up to four myGrid™-enabled devices (cell phones, music players, camera, etc.).
   - Ensure that the devices are resting flatly on the myGrid™ charging pad. Charging will not occur if proper contact between the myGrid™ charging pad and the device is not made.
